

Eurostat SDMX Converter – Desktop Version

Below are the instructions and steps to install Eurostat’s SDMX Converter software on your computer.

You will need the software to complete the exercises.

1. Navigate to <https://bit.ly/3qDa7Br>, click “Download” and wait until it is completed.
2. Unzip the downloaded file **converter-wizard-app_v7.9.5_2020.06.15.zip** into a separate folder.
3. Open the folder and navigate to sub-folder **app\ConverterWizardApp**.
4. Double-click the file **Converter.bat**. SDMX Converter Wizard should start if you have Java installed.
5. If you do not have Java installed, please download Java from <https://java.com/en/download/> and follow the instructions to install.

Tip:

When you unzip the file downloaded from Eurostat, there will be a folder named **app**. Open that folder, and open sub-folder named **ConverterWizardApp**. You will see a file there named **Converter.bat**, but it may show up simply as **Converter** because the file extension is often hidden. Please double-click the file. The wizard will start if you have Java installed (picture below).

SDMX Converter v7.9.5\app\ConverterWizardApp

Name	Status	Date modified	Type	Size
 config		15/06/2020 4:10 PM	File folder	
 lib		15/06/2020 4:10 PM	File folder
