

Session 1b. Group activity on relevance, users and uses of TUS

**Regional Workshop on Time-use Statistics
ESCWA region**

Who is a 'user' of time-use statistics (TUS)?

Who is a 'user' of time-use statistics (TUS)?

Why are TUS important for these users?

Group exercise:

1. Each group comes up with a list of user groups (15 minutes).

A. Specify user groups

- Who are current and potential users of time use statistics?

B. Specify their needs

- What information they demand?
- What information could be useful for them?

2. Each group chose a topic to discuss (15 minutes)

Time-use data and SDGs

- Do you have concrete examples on the use of time-use data to monitor SDGs?
- Do you think the existing tools / methods to produce time-use data provide sufficient information for SDG monitoring?
- How can we fill existing time-use data gaps to monitor SDGs?

Emerging uses of time use data

- What are the current trends in time-use research / data collection? Are there any emerging issues?
- Which other topic areas might benefit from time-use data?
- What partnerships are needed to strengthen time-use data?

3. Report back to plenary (15 minutes)

Thank you for your attention!
