Shared Prosperity Dignified Life

Ecological corridors (Tunisia), a Nature based Solution & LACT project

Who we are ?

COLLECTIF D'ACTEURS POUR LA PLANTATION ET LA
TRANSITION ENVIRONNEMENTALE

A new model for climate solidarity through agroforestry

- A social enterprise based in Marseille
- 1 local NGO based in Tunisia
- A NbS standard in process
- A public-private partnership-based approach
- Ready to scall up !

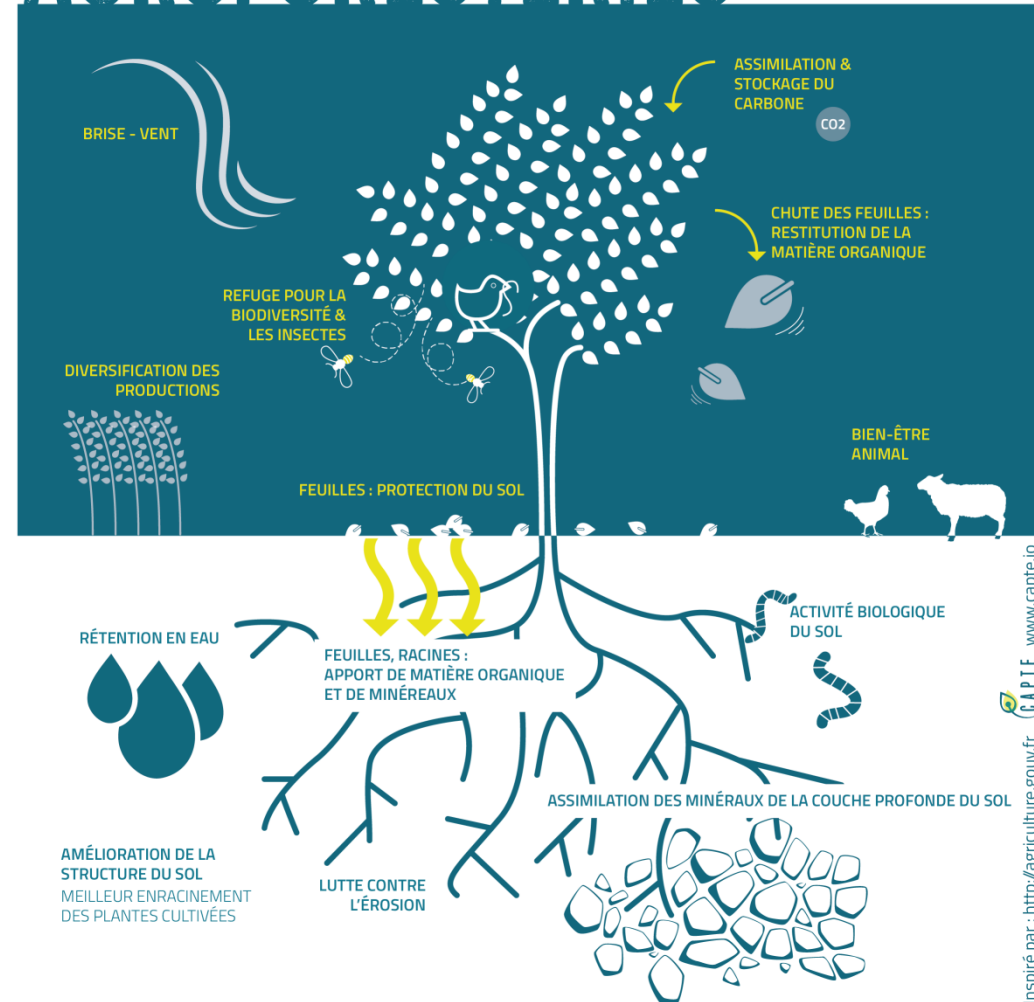

*CAPTE is a collective of stakeholders that take action in
favour of the environmental transition planting trees*

Ecological corridors (Tunisia), a Nature based Solution LACT project

What we do

- Support implementation agroforestry systems
- Protection and conservation of rare biodiversity systems
- Sensitization of the youth
- Digital and long-term monitoring
- First experience of FMNR in Tunisia
- Advocacy and value chain development

AGROFORESTERIES

CAPTE

www.capte.io

Ecological corridors (Tunisia), a Nature based Solution & LACT project

From micro to medium

- More than 120 partners farmers involved
- More than 20 000 trees / 60 ha planted in 5 waves
- More than 70 ha of meslin fodder
- More than 500 local actors engaged, 200 youths
- 10 mobile nurseries produce 20000 trees / year
- 3 “environmental club “ with agricultural students

The Nature based Solution approach

- National strategic frameworks (Tunisian NDC)
- High value native's trees => increase of vegetal cover ; improved water cycle and generate news incomes
- Reinforced adaptation to CC
- Nature based solutions will play an essential role to build stronger agrosystems
- Agro-ecology's technical specifications inform the design of NbS

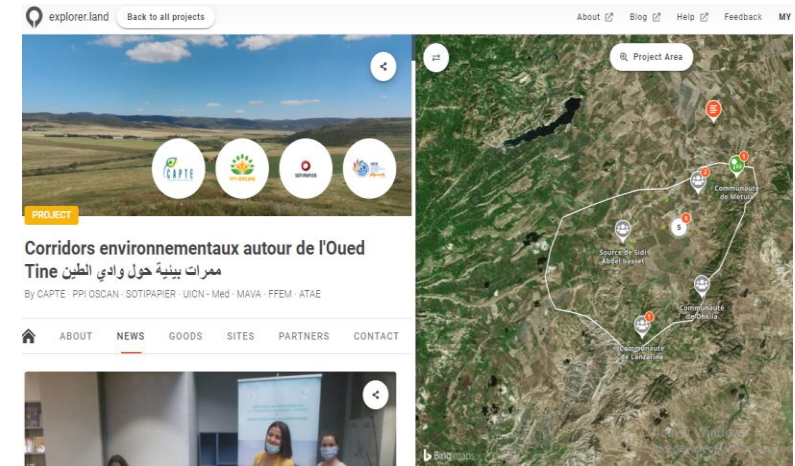

Ecological corridors (Tunisia), a Nature based Solution & LACTproject

Collaboration & Transparency

- Insight into the cooperation with OpenForests and its unique M&E digital tool “Explorer.land”
- Adaptation of our BDD with the 72 NbS indicators
- Integration of NbS in our upcoming app’ for M&E of eco-systemic services including Carbon

Shared Prosperity Dignified Life

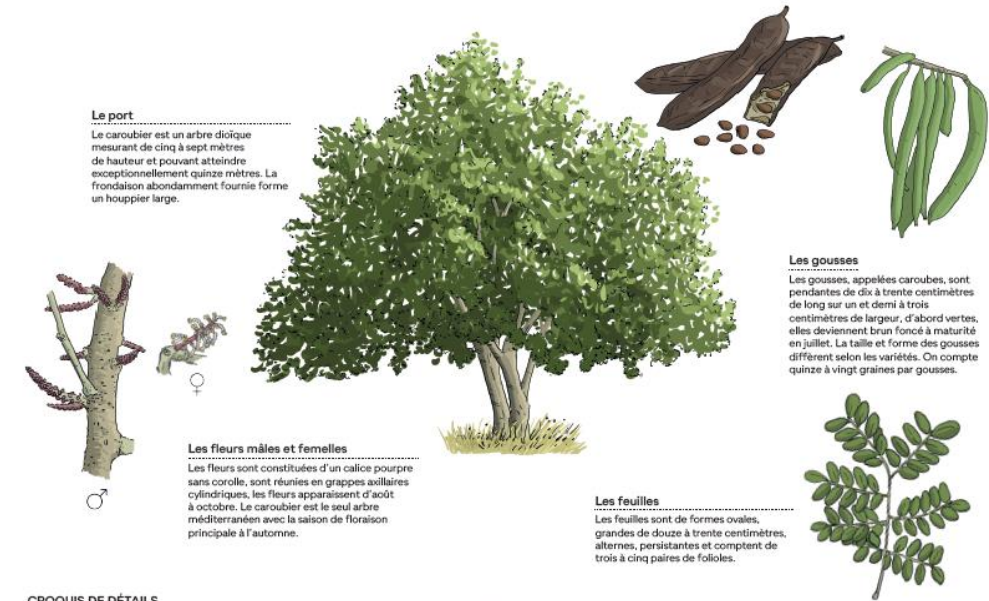

Ecological corridors (Tunisia), a Nature based Solution LACT project

Agroecosystems based on carob trees : A future NbS and adapt CC value chain ?

Ours assets

- Initiative started in 2017
- More than 20 ha experimental plots
- High climate adaptation potential
- High local & world demand
- 10 local nurseries producing 20 000 trees
- 200 ha to be planted (until 2024)
- Ongoing international scientific cooperation

Ecological corridors (Tunisia), a Nature based Solution & LACT project

Focus on FMNR : Opportunity to scale up impacts

Farmer Managed Natural Regeneration

- A low cost & agroforestry effective approach
- Empowering farmers partners
- First pilot on more than 50 ha
- Inspired by the Nature and the invisible forest

Ecological corridors (Tunisia), a Nature based Solution & LACT project

The identification, research and conservation of endemic plants (classified in the IUCN° red list)

- drawing up participatory plans with the local population to conserve biodiversity and restore ecosystems
- promoting good farming practices
- raising environmental awareness
