

Objectives of the Training

Training on Applying the Climate Change Vulnerability Assessment Methodology in the Arab Region, 11-13 May 2014, Beirut

Kerstin Fritzsche, Project Manager, adelphi

Structure & aims of the training

What does this training offer you?

- Benefit from regional joint efforts to better understand climate change vulnerability (knowledge, data, tools).
- Learn how to apply a methodology to assess climate change vulnerability for different sectors and to better understand the cause-effect relationships behind.
- Build your capacities in applying the methodology using GIS.
- Develop a network and exchange with key regional institutions working in relevant fields of expertise (especially climate, water, agriculture).
