Challenges: Mega projects

CBD

- The conservation of biological diversity
- The sustainable use of the components of biological diversity
- The fair and equitable sharing of the benefits arising out of the utilization of genetic resources

Vision NBSAP

By 2050, biodiversity is valued, conserved, restored and wisely used, maintaining ecosystem services, sustaining a healthy planet and delivering benefits essential for all people

The main “high-level” elements of the Strategy that provide the framework for the NBSAP as a whole.

Long-term vision

Principles governing the strategy

Main goals or priority areas

National Targets (SMART)

National actions to achieve the strategy, with

Application of the NBSAP to sub-national entities

Sectoral action and mainstreaming

Plan for capacity development for NBSAP implementation, including a technology needs assessment

Communication and outreach strategy for the NBSAP

Plan for resource mobilization for NBSAP implementation

+ add recommendations

- **Farmers, children and women**
- Strategies and action plan from **grassroot**
- **Partnership: Gov., NGOs, CSOs, ACADEMIA**
- **Capacity building**
- **Centers for biodiversity and sustainability** that do research, education, and conservation
