Validate The Idea Using Cartons

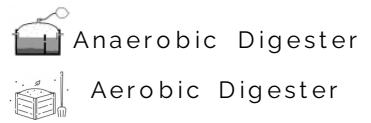

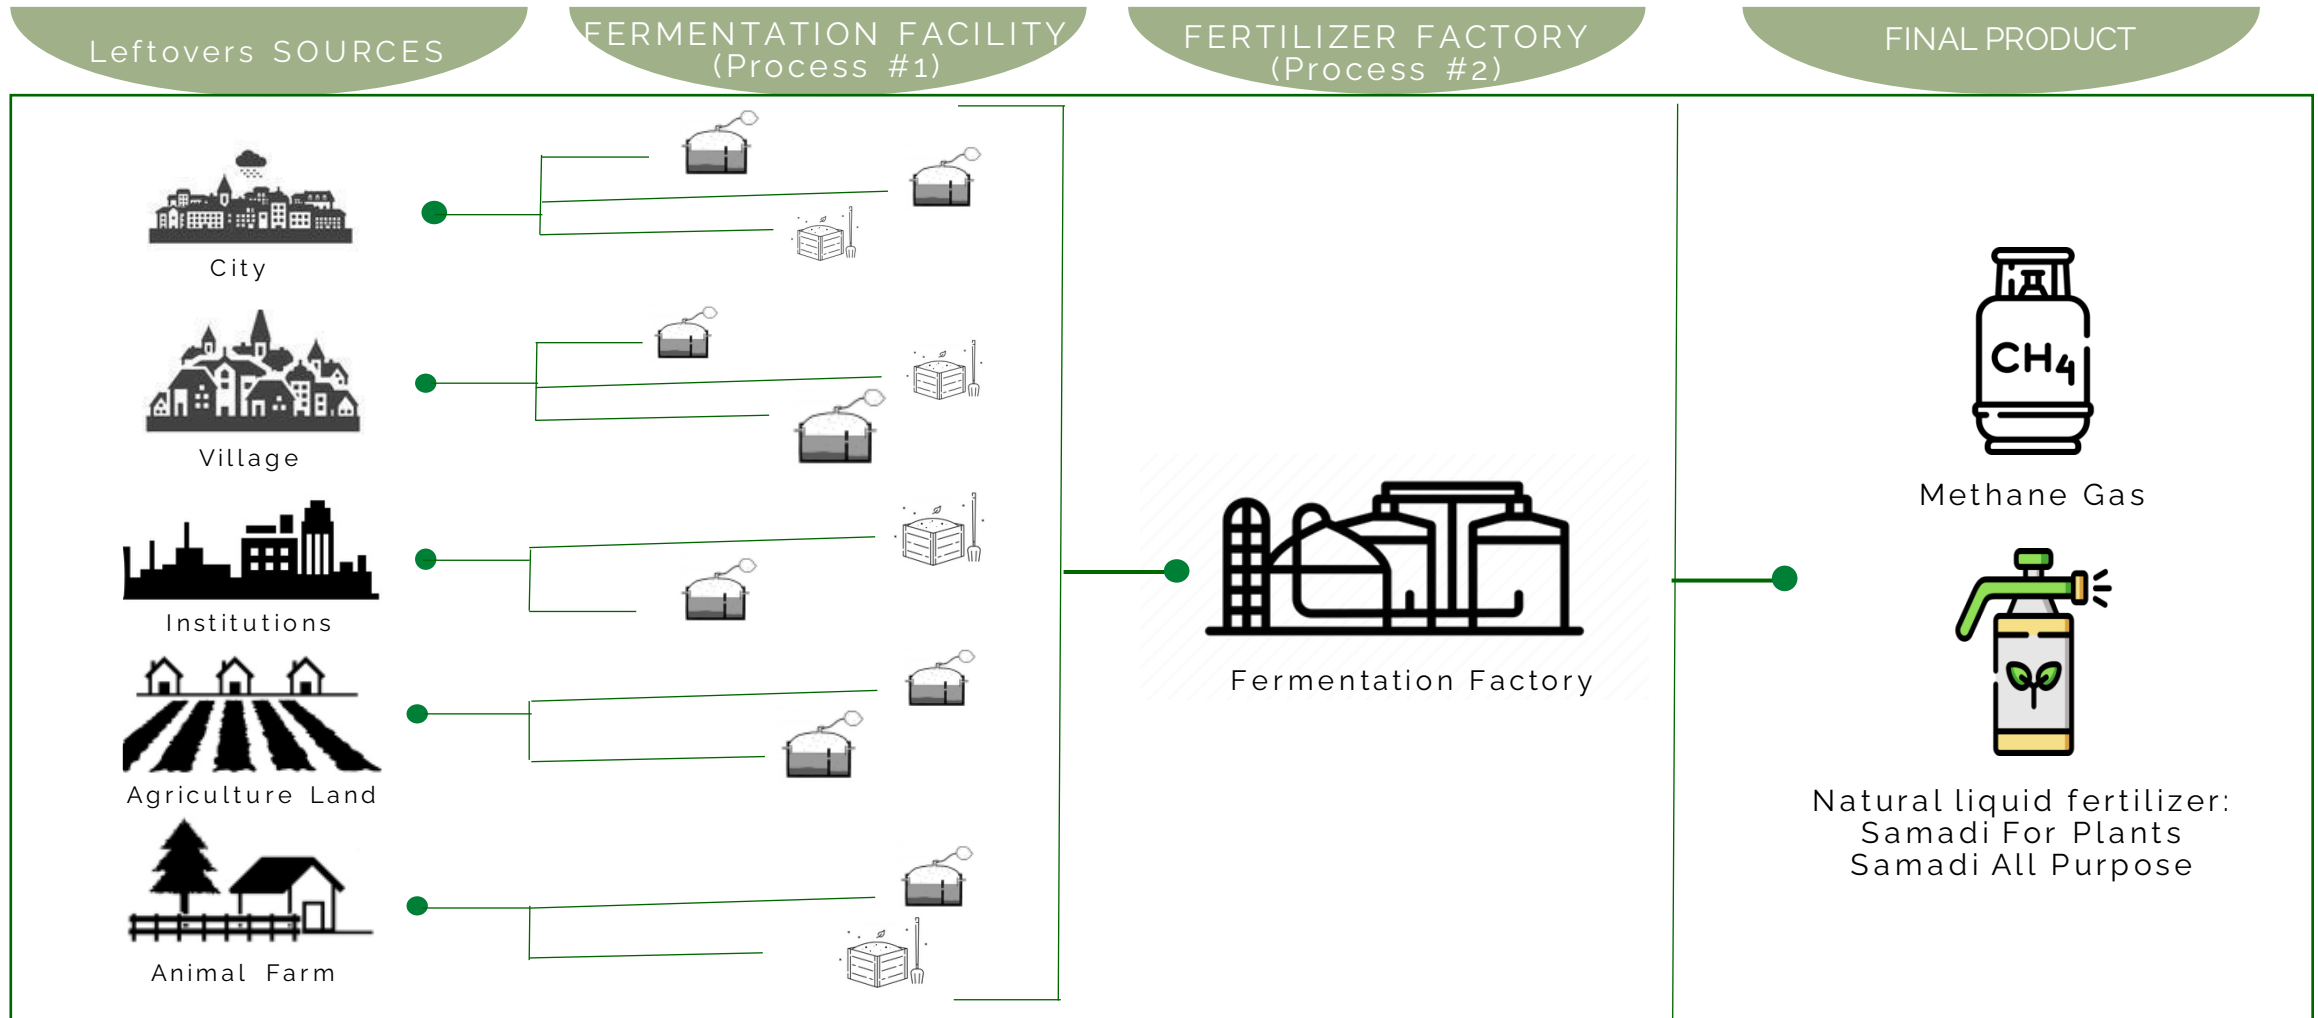

First Digester with 2kg of daily capacity...

Third Digester with 10kg of daily capacity..

Production Process

Samadi for All Purpose

Samadi for Plants

Competition Matrix

GARBALISER Position

1. Speedy
2. Simple
3. Sundry
4. Safe
5. Sustainable

Best Quality
Natural

Fish Liquid Fertilizer

Chemical
Fertilizer

Traditional
Compost

Best Price

| 30% better agricultural results

| 20% growth profit

| Better impact on human health

| Life-cycle sustainability

Product demonstrated

1. Provides plant immunity

2. Eliminates insects

3. Protects the plant from diseases

GARBALISER targets these 8 GOALS

Because we care about Lebanon, we took the decision to produce with least waste and pollution possible!

1. Digesters to produce fertilizer and methane

2. Filter

3. Gas Storage

4. Convert gas to heat

5. Use heat in fertilizer production

Relying 100% on renewable energy, Thanks to energy efficiency measures!

- Solar panel

- Solar system

- Insulation of the walls and roof
