

Training Workshop in CRVS evaluation
Amman, 28-30 June 2022
Prof. Michel Guillot

Lecture 5 - Assessing the Completeness of Death Registration
One-Census Methods

You are provided with population and death data for El Salvador, females, 1961.

- A. Apply the Brass Growth Balance method to these data, using the IUSSP spreadsheet and instructions.
- B. Apply the Preston-Coale method to these data, using the IUSSP spreadsheet and instructions.
- C. Discuss the assumptions underlying these two methods.
- D. Make an overall assessment of death registration coverage in this population.
