Iraq National MPI Framework (TBC)

Dimension	Indicator	Deprivation Cutoff: A household is deprived if...
Education	School attendance	Any school-aged child (6-17) in the household is not attending school
	Years of schooling	No household member aged 15 and older has completed nine years of schooling
	Access to internet	The household does not have access to the internet at home
Housing	Home ownership	A member of the household does not own the dwelling
	Overcrowding	The household has more than three members per sleeping room
	Electricity	The household does not have access to electricity or only has access to electricity through the public grid
	Clean energy	The household is using unclean fuels for cooking (gasoline, diesel, kerosene, paraffin, coal, lignite, charcoal, wood, crops, grass/straw, animal dung, sawdust, or other), heating (gasoline, diesel, coal, lignite, charcoal, wood, crops, grass/straw, animal dung, pellets, woodchips or other), or lighting (kerosene, paraffin, charcoal, wood, animal dung, oil lamp, candle, or other)

Iraq National MPI Framework (TBC)

Dimension	Indicator	Deprivation Cutoff: A household is deprived if...
Housing (Cont'd)	Drinking water	The source of drinking water for the household is not improved (unprotected well or spring, surface water from river, dam or lake, or other) or it takes 30 minutes or more round trip to collect the water or in the last month the household did not have sufficient quantities of water
	Sanitation	The sanitation facility is not improved (flush to open drain, pit latrine, no facility or other) or it is shared with other households
Health	Child mortality	A child under 18 has died in the household in the five year period preceding the survey
	Nutrition	Any child under the age of 5 in the household is suffering from underweight, stunting or wasting
	Early marriage	Any female in the household has married before turning 16
