

***Expert Meeting on ESCWA Initiative for
Promoting The Digital Arabic Content
Industry Through Technology Incubators
1-2- October 2012, Amman, Jordan***

**New perspectives of Technology Incubator
At Science & Technology Center- Aden
University**

*Prof. Rokhsana Ismail
Director- STC- Aden Univ.
President – YWASTD*

Introduction

The main idea behind the technology incubator at Center of Science and Technology is to stimulate the innovation process by linking technology development with market demands, while providing capital for innovation through funds and/or loans, particularly in startup enterprises.

The background features a stylized illustration. At the top center is a sun with a circular face and several triangular rays. Below the sun is a profile of a woman's face, looking towards the left. The drawing is done in simple, thin lines. The overall color palette is soft, with a light yellow background and a blue-green patterned area on the left side.

Many clients have good experienced and strong technical base skills in designing and developing their electronic system and/or software. However, most are lacking strategy and planning skills of how to develop their products to be marketable and sustainable.

Technology incubator offered the following services (but are not limited):

- Provide working premises for implementing and testing innovative ideas.
- Marketing ideas and facilitation.
- Product development support directly or by linking with other ICT development institution.
- Technical assistances.
- Communication and information services through access to modern ICT facilities.

The background features a stylized illustration. At the top center is a sun with a circular face and several triangular rays. Below the sun are two profile faces. The face on the left is larger and has a neutral expression. The face on the right is smaller and appears to be smiling. The entire scene is set against a light yellow background with faint, abstract patterns in shades of green and blue on the left side.

Technology incubator embrace two project which are :

- ICT for developing Deaf and Mutes.
- Website for Secure Online Banking.

ICT for developing Deaf and Mutes

The programme contains the following :

- Translation For Deaf & Mute's "Dictionary".
- Atlas For Deaf & Mute
- Atlas Geography
- Atlas Human Body
- Design Google "Google for Deaf & Mutes" so that through the use of the Internet to research and sign language, but in deaf and mute's language.

The background features a stylized illustration. At the top center is a sun with a circular face and several triangular rays. Below the sun, two human profiles are shown in profile, facing each other. The profile on the left is a man's face, and the profile on the right is a woman's face. The entire scene is set against a light yellow and green background with faint, decorative patterns.

❑ Design a program "Messenger for Deaf & Mute" provides for the deaf and mute from which easily chat using the characters and the full vehemence of their own ...

❑ Design a program to SMS "SMS Mobil for Deaf & Mute" to allow the deaf and mute to communicate with each other in their own language.

Programme Objectives:

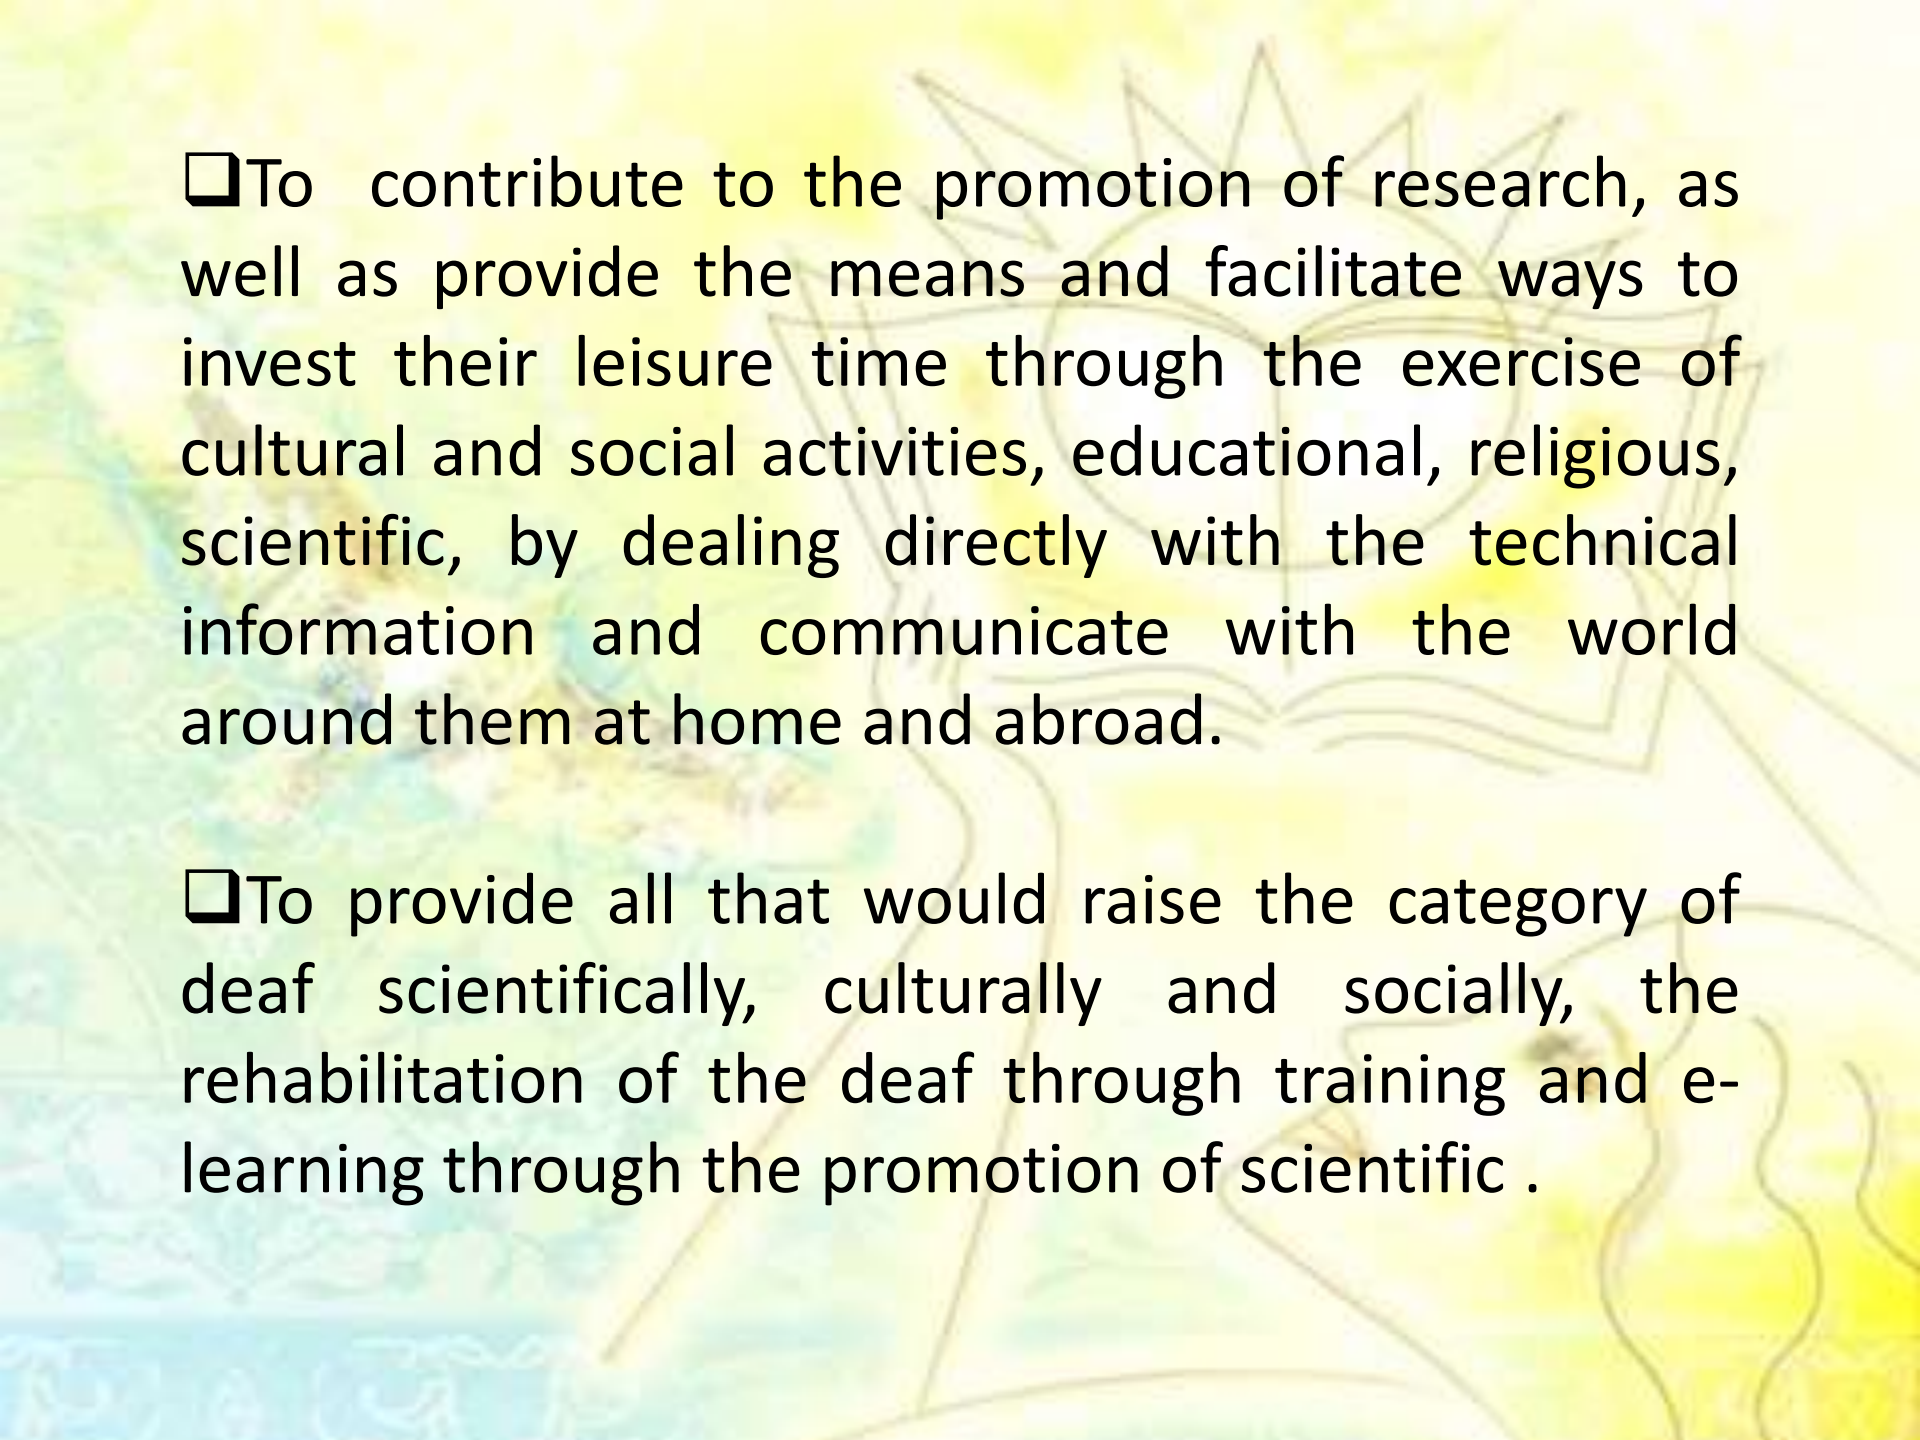

General Objective:

□ integration of the deaf in the community to keep abreast of developments and challenges that surrounds them.

□ Including the ongoing evolution in technology and information technology.

Specific Objective:

□ to take advantage of the deaf community and to highlight the talents and the definition of different Community and awareness of cases in this category, capabilities and organization to deal with them

☐To contribute to the promotion of research, as well as provide the means and facilitate ways to invest their leisure time through the exercise of cultural and social activities, educational, religious, scientific, by dealing directly with the technical information and communicate with the world around them at home and abroad.

☐To provide all that would raise the category of deaf scientifically, culturally and socially, the rehabilitation of the deaf through training and e-learning through the promotion of scientific .

Website for Secure Online Banking

- General Idea
- Problems Facing Bank's Services
- Software Protection Dongle
- Protection Dongle
- Protection Methods

- 
- Protection of Copy Rights for Implications
 - Description of working
 - Economic Feasibility
 - positive remarks of using Dongle
