## Migration Governance Snapshot: The Republic of Serbia

KEY FINDINGS

English

### DOMAIN 5: MOBILITY DIMENSIONS OF CRISES

Migration Governance: examples of well-developed areas:

- Humanitarian assistance is provided regardless of migration status, and is coordinated by the Commissariat for Refugees and Migration.
- Authorities use several types of communication systems to spread information on the evolving nature of crises, including channels to reach immigrants.
- A response plan was adopted in 2015 to be able to effectively respond to rapid increases in the number of migrants and asylum-seekers entering Serbia. The plan is regularly updated according to need.

Areas with potential for further development:

- There is currently no comprehensive policy or legislative framework that addresses environmental degradation and the adverse effects of climate change.
- The National Strategy for Protection and Rescue in Emergency Situation, adopted in 2011, does not include specific provisions for addressing the displacement impacts of disasters.

**Mobility dimensions of crises**

This domain studies the type and level of preparedness of countries when they are faced with mobility dimensions of crises, linked to either disasters, the environment and/or conflict. The questions are used to identify the processes in place for nationals and non-nationals both during and after disasters, including whether humanitarian assistance is equally available to migrants as it is to citizens.
