

Climate Change – Migration – Urbanization

**Migration and SDGs in the Arab Region I
Capacity Building Workshop by the Working Group on International Migration in the Arab Region**

16 – 17 July 2018 | Cairo, Egypt

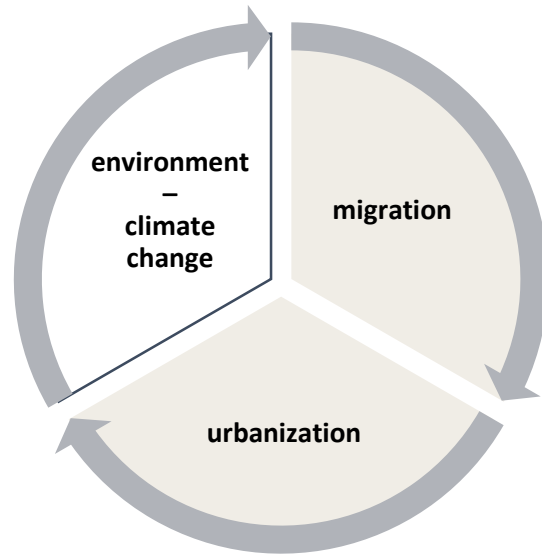

Reference: Google Earth (15 July 2018)

Introduction

Introduction - Migration and Cities

- Cities as social hubs and centers of wealth and economic development.
- Ultimate movement towards cities in search for livelihood opportunities, security, and a decent life.
- Unfortunately, due to lack of planning and resources, many end up in overcrowded and underserved settlements or in remote urban areas that lack basic infrastructure, social services and connectivity to labor markets.
- Denied access to formal job opportunities and social protection systems and excluded from the urban advantages that they are seeking in cities, migrants, particularly the most vulnerable ones, are often stigmatized as a problem rather than recognized for their energy and potential contribution to urban life.

Arab region: core of present global debate on migration and cities

- Arab region has witnessed migration movements over centuries – “experienced” urban areas
- Migratory flows from, through and within the region are diverse, complex and vast:
 - **conflicts** in Syria, Iraq, Libya, Sudan, Yemen and Palestine contributed to one of the world’s biggest displacement crises.
 - one third of the world’s **IDPs**
 - significant number of international **labor migrants**.
- Great majority of migrants in Arab hosting countries live in urban areas or on the urban periphery.

Introduction - Migration and Cities

<https://unhabitat.org/books/migration-and-inclusive-cities-a-guide-for-arab-city-leaders/>

- Half of population in Arab countries live in urban areas, expected to increase by more than twofold over the next four decades.
- Unprecedented increase in urban population numbers, accelerated by massive migratory inflows poses challenges:

Physical and environmental challenges:

increased pressure on infrastructure and basic urban services, affordable housing and public transportation systems, increased demand for urban land, public space and social facilities (mainly schools and health facilities), depletion of natural resources and the increase of pollution;

Socio-economic challenges:

increased urban poverty rates, fragile labor markets, high unemployment levels (especially among women and youth), and competition between host and migrant communities over job opportunities (particularly seasonal and informal jobs);

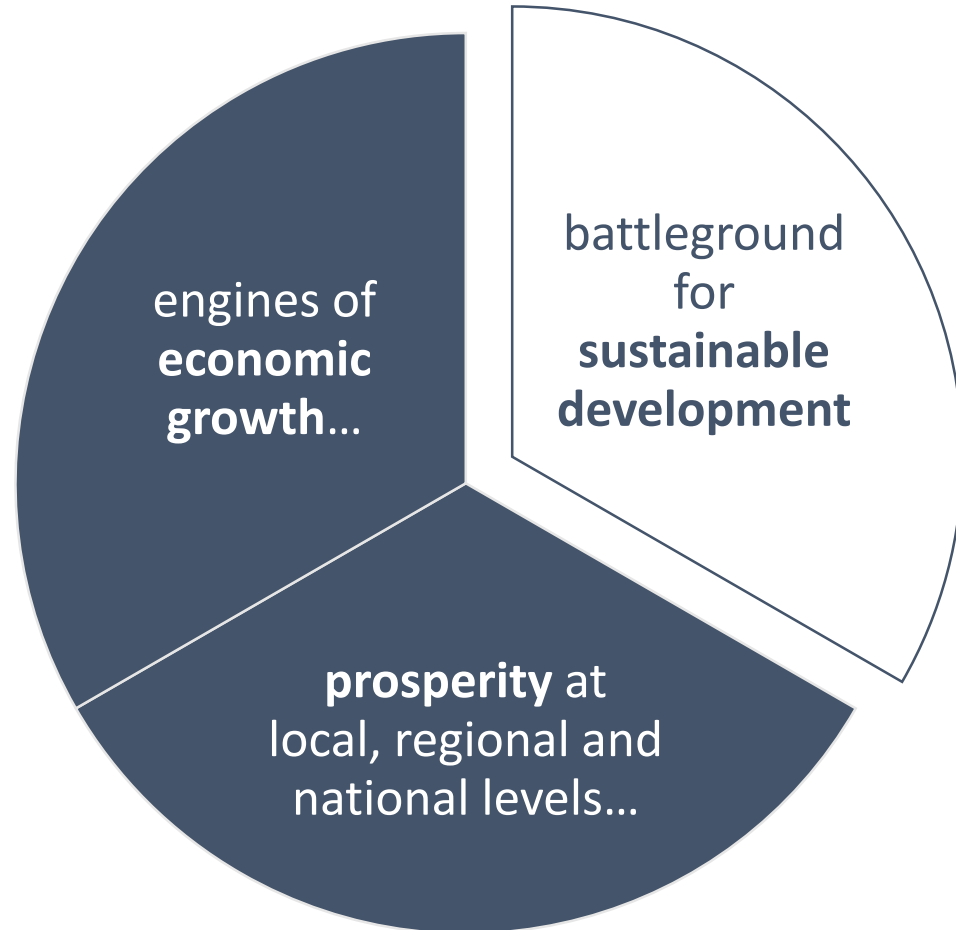

Fiscal challenges:

strains on municipal budgets and inability of many local authorities to raise their own funds to effectively cope with urban problems;

Urban governance challenges:

centralized decision-making and weak local institutions that do not have the sufficient tools and resources to administer city growth and maintain urban security and social cohesion.

Urbanization

- Urbanization one of **most powerful and irreversible** forces in 21st century
- Impossible to stop **movement of people** into cities and towns

Why? Urban SDG Targets

Stand Alone Goal On Cities

SDG11: “Make cities and human settlements inclusive, safe, resilient and sustainable”

- 2030 Agenda for Sustainable Development gives prominent role to urbanization and cities
- recognition that **cities are a string that connects all other goals together** - their density and economies of agglomeration link economy, energy, environment, science, technology and social and economic outputs
- interactions important to formulate integrated policies that enhance the transformative role of urbanization and contribute to achieve sustainable development
- one third of SDGs indicators have an urban component: Global Monitoring Framework adopted by the Statistical Commission (231 indicators) to be **measured at local level** - direct connection to urban policies and clear impact on cities and human settlements
- effective implementation of 2030 Development Agenda and monitoring and reporting of related indicators require better articulation of **Goal 11 with other SDGs** indicators that have an urban component

SDG11

- 11.1** By 2030, ensure access for all to adequate, safe and affordable **housing and basic services** and upgrade slums
- 11.2** By 2030, provide access to safe, affordable, accessible and sustainable **transport systems** for all, improving road safety, notably by expanding public transport, with special attention to the needs of those in vulnerable situations, women, children, persons with disabilities and older persons.
- 11.3** By 2030, enhance inclusive and sustainable urbanization and **capacity** for participatory, integrated and sustainable human settlement planning and management in all countries
- 11.4** Strengthen efforts to protect and safeguard the world's cultural and natural **heritage**
- 11.5** By 2030, significantly reduce the number of deaths and the number of people affected and substantially decrease the direct economic losses relative to global gross domestic product caused by **disasters**, including water-related disasters, with a focus on protecting the poor and people in vulnerable situations
- 11.6** By 2030, reduce the adverse per capita **environmental impact** of cities, including by paying special attention to air quality and municipal and other waste management
- 11.7** By 2030, provide universal access to safe, inclusive and accessible, green and **public spaces**, in particular for women and children, older persons and persons with disabilities
- 11.A** Support positive economic, social and environmental links between **urban, per-urban and rural areas** by strengthening national and regional development planning
- 11.B** By 2020, substantially increase the number of cities and human settlements adopting and implementing **integrated policies** and plans towards inclusion, resource efficiency, mitigation and adaptation to climate change, resilience to disasters, and develop and implement, in line with the Sendai Framework for Disaster Risk Reduction 2015-2030, holistic disaster risk management at all levels
- 11. C** Support least developed countries, including through financial and technical assistance, in building **sustainable and resilient buildings** utilizing local materials

Migration and Urbanization in SDGs

- 4.b: By 2020, substantially expand globally the number of **scholarships** available to developing countries in particular LDCs, SIDS and African countries, for enrolment in higher education, including vocational training and ICT, technical, engineering and scientific programmes in developed countries and other developing countries.
- 5.2: Eliminate all forms of violence against all women and girls in the public and private spheres, including **trafficking** and sexual and other types of exploitation.
- 8.7: Take immediate and effective measures to **eradicate forced labour**, end modern slavery and **human trafficking** and secure the prohibition and elimination of the worst forms of child labour, including recruitment and use of child soldiers, and by 2025 end child labour in all its forms.
- 8.8: Protect labour rights and promote safe and secure working environments of all workers, including **migrant workers, in particular women migrants**, and those in precarious employment.
- 10.7: Facilitate orderly, safe, regular and responsible migration and mobility of people, including through implementation of **planned and well-managed migration policies**.
- 10.C: By 2030, reduce to less than 3% the transaction costs of **migrant remittances** and eliminate remittance corridors with costs higher than 5%.
- 16.2: End abuse, exploitation, **trafficking** and all forms of violence and torture against children.
- 17.18: By 2020, enhance capacity building support to developing countries, including for LDCs and SIDS, to increase significantly the availability of high-quality, timely and reliable **data, disaggregated** by income, gender, age, race, ethnicity, **migratory status**, disability, geographic location and other characteristics relevant in national contexts.

“Reduce inequality within and among countries”

“Make cities and human settlements inclusive, safe, resilient and sustainable”

Global Agreements > National Commitments > Local Impact

- Highlights impact of humanitarian crisis and forced displacement of people on development progress
- Calls for empowerment of vulnerable groups, including refugees, internally displaced persons and migrants
- Calls for access by all – including migrants – to life-long learning opportunities
- Commits to eradicating forced labor and human trafficking and to end child labor
- Recognizes the positive contribution of migrants for inclusive growth and sustainable development

To find out more about the links between the SDGs and the work of local and regional governments, see:
“The Sustainable Development Goals: What Local Governments Need to Know”

New Urban Agenda

Paragraph 28.

We commit to ensure the full respect for **human rights** and humane treatment of refugees, internally displaced persons, and migrants, regardless of **migration status**, and support their **host cities** in the spirit of international cooperation, taking into account **national circumstances**, and recognizing that, although the movement of large populations into towns and cities poses a variety of challenges, it can also bring significant **social, economic, and cultural contributions to urban life**. We further commit to strengthen **synergies between international migration and development**, at the global, regional, national, sub-national, and local levels by ensuring **safe, orderly, and regular migration** through **planned and well-managed migration policies** and to **support local authorities** in establishing frameworks that enable the **positive contribution** of migrants to cities and strengthened urban-rural linkages.

Side Event at One UN Pavilion:
“Managing migration well - for more inclusive and resilient cities”

New Urban Agenda

Migration and sustainable urbanization are closely linked!

New Urban Agenda

- proposes commitments to **support host cities**, with the challenges associated with **movement of large population** while recognizing the significant social, economic and cultural contributions they make to urban life
- opportunity for all of us, including migrations and refugees, and **leaving no one behind**
- when adopted **implemented** a major step forward

If migration is unplanned, unmanaged, and migrants and refugees are excluded from the **planning process**, it further marginalizes and discriminates those in need of protection, contributes to rising inequality and prevalence of slums.

Mayors and city leaders are placed in the difficult position of maintaining the balance of supporting respective needs of host communities and migrants, and managing potential conflict.

- Maintaining **social cohesion** is a key concern
- Opportunity to manage the **growth** of their cities

National governments have a key role to play to put everything in place to ensure sustainable urbanization. Mayors and City Governments have the will. They need national government support to deliver.

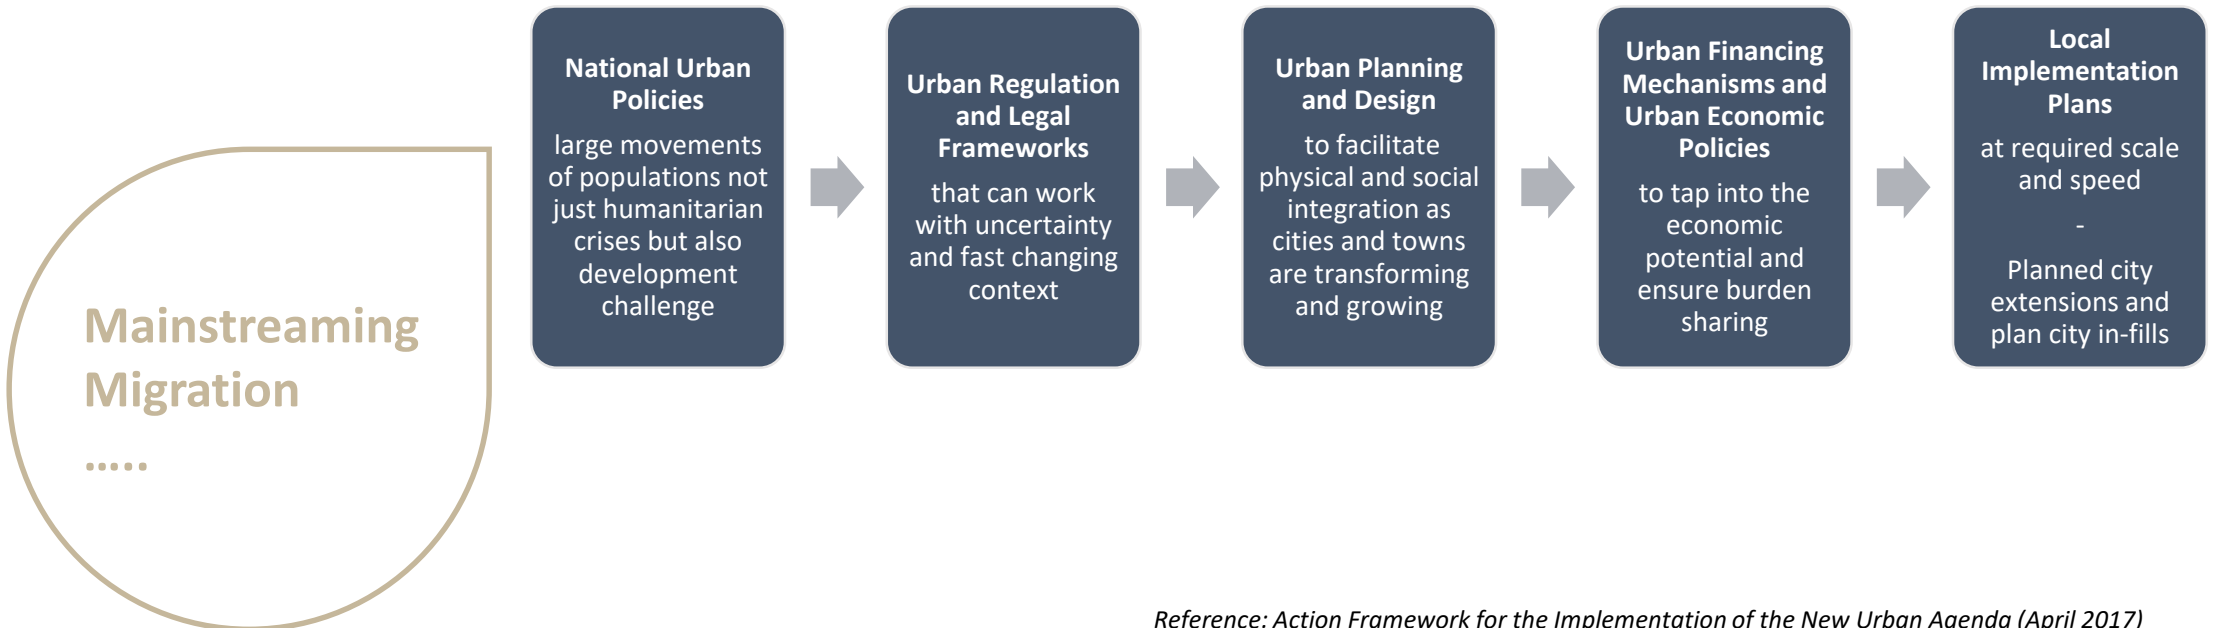

New Urban Agenda

IMPLEMENTING
THE NEW
URBAN AGENDA

5 Strategic Frameworks

The advantages of well-planned and designed urbanization are enormous as they can contribute to the solutions to many of the problems the world is facing today, including migration.

Inclusive Cities

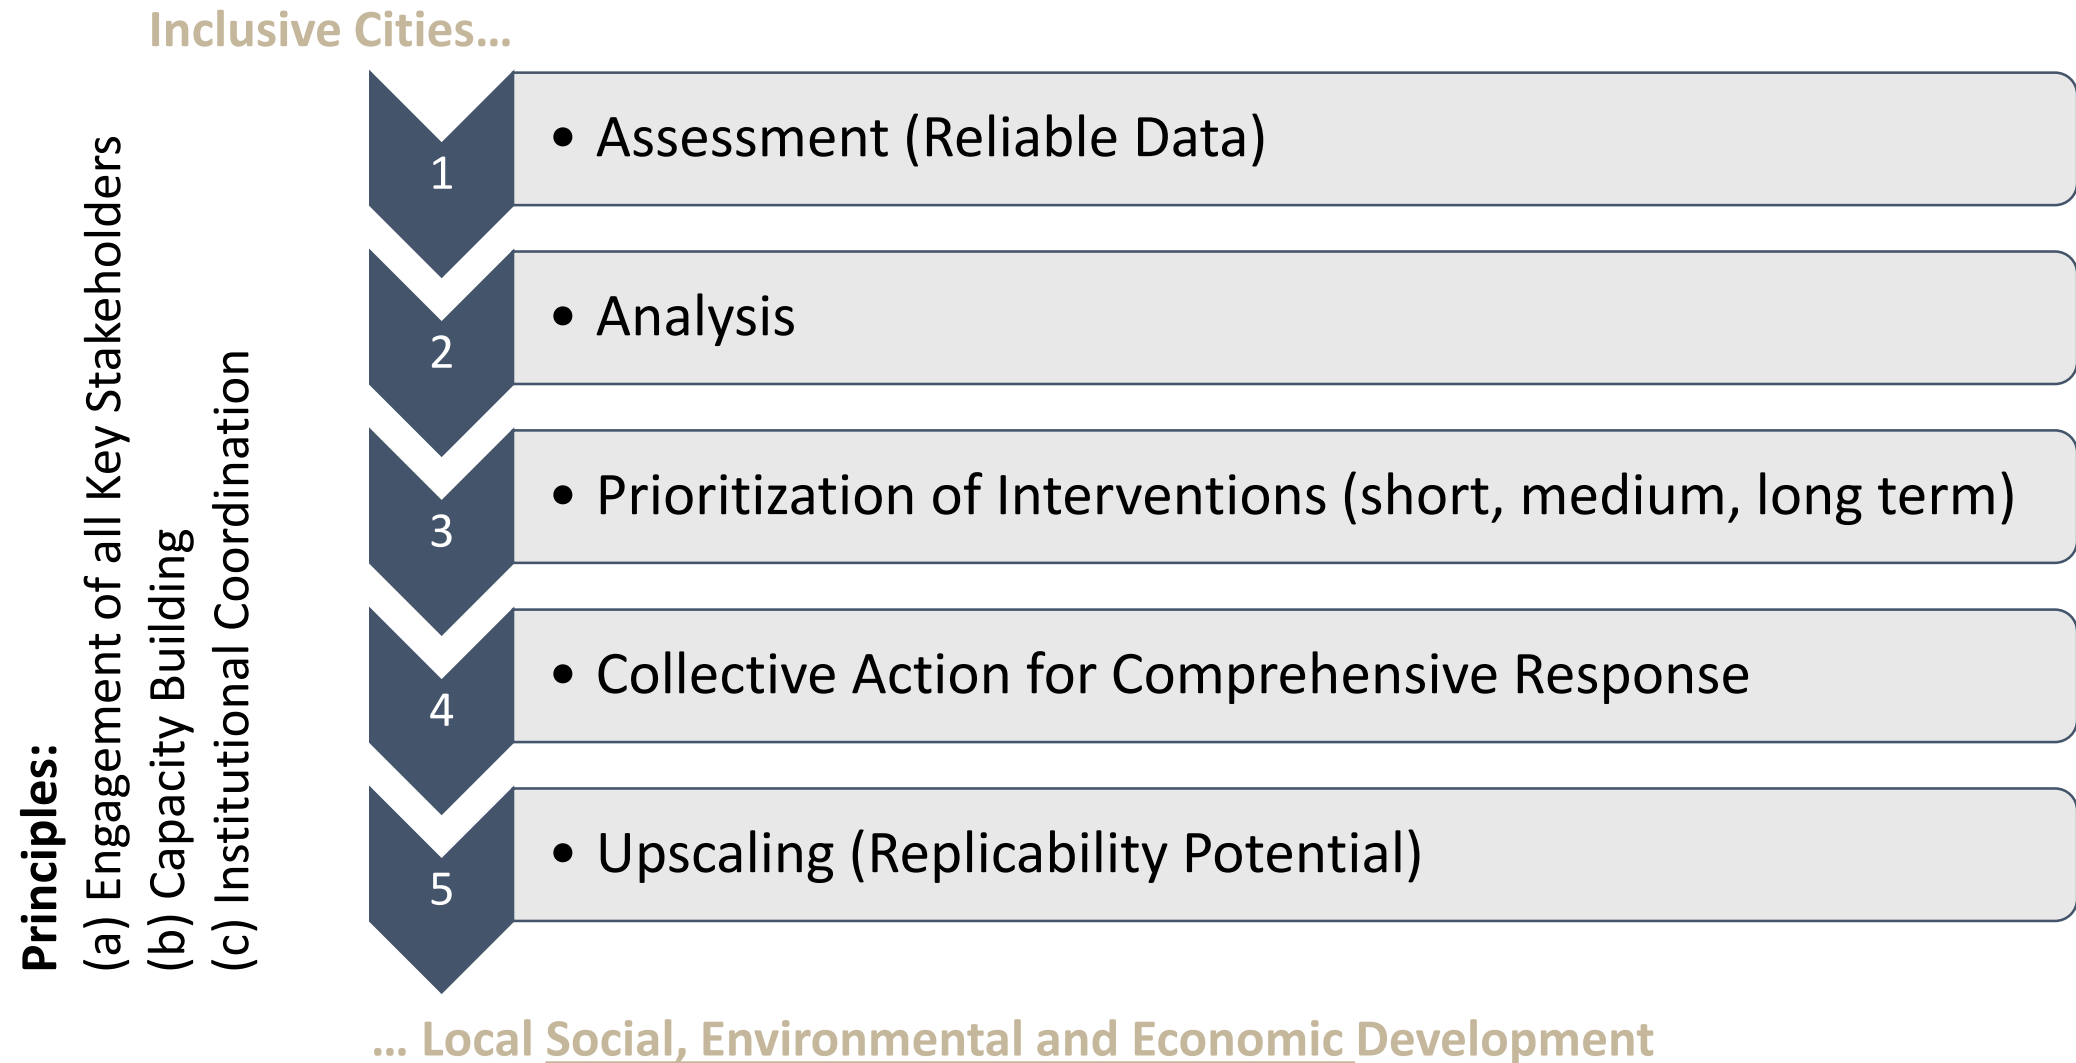

<https://unhabitat.org/books/migration-and-inclusive-cities-a-guide-for-arab-city-leaders/>

KEY COMPONENTS OF AN INCLUSIVE CITY	GUIDING DIRECTIONS
<p>Access to Adequate Housing and Living Standards (See Section 4)</p>	<ol style="list-style-type: none"> 1. Recognize self-help housing arrangements and support vulnerable residents in gaining access to improved services and secure tenure 2. Help increase the supply of adequate housing units through formal channels and support vulnerable groups to gain access to these units 3. Manage urban growth and enact regulatory reforms that reduce the informal settlements spiral in the future
<p>Access to Livelihoods and Job Opportunities (See Section 5)</p>	<ol style="list-style-type: none"> 1. Support small businesses and start-ups, particularly innovative entrepreneurial initiatives that employ the skills of vulnerable urban dwellers including migrants 2. Sustain informal activities through urban planning and regulatory mechanisms 3. Launch new urban development initiatives that can create income generating opportunities for locals and migrants
<p>Access to Infrastructure and Public Services and Facilities (See Section 6)</p>	<ol style="list-style-type: none"> 1. Form strategic coalitions and partnerships with a broad range of actors to finance, implement, and coordinate vital interventions in infrastructure and services provision 2. Support scaling-up successful area-based approaches and linking them with long-term city or regional level planning efforts
<p>Civic Engagement and Participation in City and Community Life (See Section 7)</p>	<ol style="list-style-type: none"> 1. Invest in the design and upgrading of shared communal spaces 2. Facilitate community participation and dialogue to increase public trust in formal institutions 3. Support the establishment of community organizational structures and social networks

- Linking urban international, national and local **stakeholders** with migration actors.
- Implementing SDG11 on sustainable cities and communities **linking** it to migrant populations in vulnerable situations.
- Implementing **communication** strategies regarding beneficiaries and local communities.

Pillars of Inclusive Local Action

CPI - Global Monitoring Framework for SDG11 and New Urban Agenda

City Prosperity Index

- cities as focus for change and venue where policies are realized
- forge new linkages among actors and offer innovative solutions, with the potential to be part of national agendas, and to influence regional and global development
- poor planning, absence of effective governance and legal frameworks, fragile institutions, low capacity of local authorities, and lack of a sound monitoring mechanism, diminishes the possibility to promote long-term sustainable urban development
- fundamental towards achieving higher levels of urban prosperity and sustainable urban development for all: **data and metrics for decision-making on best policies** to adopt, assist in tracking changes, whilst systematically documenting performance at outcome level
- enables city authorities, as well as local and national stakeholders, to identify **opportunities and potential** areas of intervention for their cities to become more prosperous
- six dimensions serves to define targets and goals that can support the formulation of **evidence-based policies**, including the definition of city-visions and long-term plans that are both ambitious and measurable
- global monitoring mechanism, adaptable to national and local levels that can provide a general framework that allows cities, countries, and the international community to measure progress and identify possible constraints

<https://unhabitat.org/urban-initiatives/initiatives-programmes/city-prosperity-initiative/>

CPI - Global Monitoring Framework for SDG11 and New Urban Agenda

... a holistic approach to prosperity

- Prosperity (definition by UN-Habitat) is a social construct that materializes in the realm of human actions
- Builds on the conditions prevailing in a city at any time, despite its size or location
- Policies for well-balanced, harmonious development in a fair and just environment.

Elements:

1. Productivity
2. Infrastructure
3. Quality of life
4. Equity and inclusion
5. Environmental sustainability
6. Governance and legislation

Fundamental principles of **human rights** need to be measured:

- process of urbanization to adhere to human rights principles
- city, outcome of urbanization, to meet human rights standards
- access to adequate housing, water and sanitation or any other civic, cultural, economic, political and social right are integral parts

<https://unhabitat.org/urban-initiatives/initiatives-programmes/city-prosperity-initiative/>

Climate Induced Displacement

Towards Sustainable, Safe, Resilient and Inclusive Urbanization in the Context of Climate Migration in North Africa

Prepared by IOM and UN-Habitat Regional Offices,
Cairo – Egypt

Main objective:

1. Enhance understanding of correlation between migration, climate change and urbanization in five different countries in North Africa;
2. Provide policy guidance on mainstreaming this issue in National Urban Policies;
3. Implement adaptive pilot initiatives at local level;
4. Regional exchange, peers learning (national and local level, among various stakeholder groups).

Focus on five countries:

(1) Morocco, (2) Algeria, (3) Tunisia, (4) Egypt and (5) Sudan.

Three-tier approach:

(1) preparatory, (2) implementation and (3) evaluation.

thank you
