Content

- **What's OGP ?**
- **Joinning OGP**
- **OGP action plan drafting**
 - **PROCESS**
 - **CONTENT**
- **Follow up of the implementation**

The Open Government Partnership

A **multi-stakeholder initiative** through which governments make **concrete commitments** to:

- Promote transparency
 - Empower citizens
 - Fight corruption
- Harness new technologies to strengthen governance

Principles of OGP

- **Original idea:** Build upon open government momentum to push agenda on transparency, accountability and citizen engagement especially using ICT
- **Eligibility:** Basic protection for civil liberties and citizen engagement
- **Governance:** Equal power governments and civil society
- **Process:** Broad consultation with citizens, civil society, private sector to develop national Action Plan
- **Plan:** Country commitment to their citizenry
- **Goal:** more open government and society; restore trust citizen - state

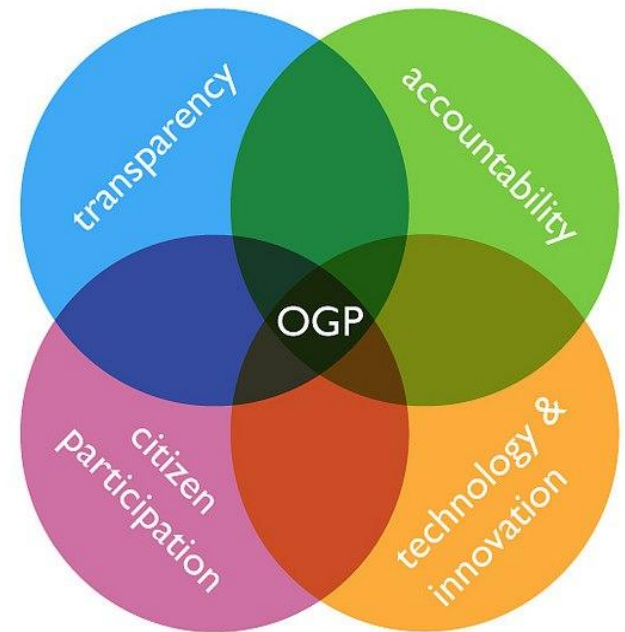

What makes OGP Different?

Countries develop action plans with **concrete ambitious commitments** and **firm timelines**

Independent reporting to promote accountability

OGP is a **genuine partnership** of government and civil society at all levels

Governments, civil society, and the private sector come together to **learn from each other, partner, and innovate**

Tunisia Efforts to join OGP

Access to information

- The **decree law n°41 dated 26 of May 2011** related to the access to administrative documents of public structures as amended and completed by the decree law n° 54 dated 11th of June 2011 according to it the freedom of information right was devoted. Circular 25 on 5 May 2012 in relation to access to administrative documents of public structures.

Open data portal “data.gov.tn”

- dealing with information collected from public structures and providing open access to public documents.
- This site has been in place since July 2012 and it represents a single window for access to administrative documents, it can provide :
 - Access to administrative document by sectors in two languages (french and arabic) and download documents
 - Submit proposals and new ideas by users to develop and enrich the portal with new data through two forms in the portal "proposals" and "request data",
 - Access to data sets

A new constitution

The new constitution was adopted by the Constituent National assembly on 26 January 2014. The new constitution has many articles about public affairs management .

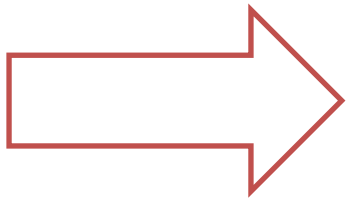

Article 10 : The state shall ensure the proper use of public funds and take the necessary measures to spend it according to the priorities of the national economy, and **prevents corruption** and all that can threaten national resources and sovereignty.

Article 15:The public administration is at the service of citizens and the common good. It is organised and operates in accordance with the principles of impartiality, equality and the continuity of public services, and in conformity with the rules of **transparency, integrity, efficiency and accountability**.

Article 139:Local authorities shall adopt the mechanisms of **participatory democracy** and the principles of **open governance** to ensure the broadest participation of citizens and of civil society in the preparation of development programmes and land use planning, and follow up on their implementation, in conformity with the law.

OECD support to join OGP

- The first meeting of the steering committee responsible for the preparation of tunisian adhesion to OGP.
- Peer review meetings to prepare tunisian adhesion process between OECD experts , civil society and government representatives.

Drafting a preliminary report dealing with recommandations to tunisian government and civil society on how to fulfill eligibility criteria to OGP.

Tunisia Joins OGP

January, 14th 2014

The OGP membership of Tunisia reflects the commitment of Tunisian government to a new governance system based on principles of transparency, integrity and accountability.

Content of National Action Plan for Open Government Partnership in Tunis

Devoting transparency in the field of management of natural resources, infrastructure projects and protection of environment

- Commitment n°18 - Development of an "Open Data" platform dedicated to information dealing with petroleum and mining sectors investment
- Commitment n°19 - Improve transparency in the area of infrastructure projects
- Commitment n°20 - Devoting transparency in the area of environment protection

Some detailed commitments

Commitment n°2: Developing an integrated electronic civil petition and corruption reporting platform

- This platform will contribute to fight corruption and promote citizen participation.
- Using multiple channels (Website, Call center, SMS, direct visits of citizens,...), the system will be a gate to receive citizens' complaints and report corruption cases.
- It will allow citizens to follow-up their petition treatment process.
- Structure in charge: (Presidency of the government: The e-Government Unit and The central bureau of relationship with citizens).
- Stakeholders: The Committee of governance and corruption fight, All involved ministries.

Commitment n°10: Enhancing people participation in the decision-making process

Preparing a legal framework for public consultation:

- Consultations will be considered before all major public decision-making and before legal drafting.
- This framework is expected to determine the different stages to adopt legislation (laws, decrees,...) and to identify the intervening parties and the role of each of them in the process, according to a predefined calendar.

Development of an e-participation portal

- This platform will facilitate communication and interaction with the various administration users.
- Multiple channels of communication will be adopted in order to enable them to express their opinions, make suggestions, share their ideas about public policies and programs formulation and to follow up their implementation.

Commitment n°18: Development of an "Open Data" platform dedicated to information dealing with petroleum and mining sectors investment

- This platform will include the following categories of data:
 - The updated status of the bonds mining,
 - General indicators of investment in the sector,
 - All data relating to production,
 - consumption, import and export, distribution and sale contracts, etc.,
 - companies operating in the sector and the size of their investments, activities and their contracts,
 - fiscal crops derived from the state sector.

Implementation timeline: 2015-2016

Structure in charge: Ministry of Industry

Commitment n°19: Improve transparency in the area of infrastructure projects

1

- The implementation of a Geographic Information System for urban development plans containing urban plans approved and containing all related administrative and legal data (legal 18 texts and urban regulation) taking into consideration geographic data to make it available for interested parties (ministries, municipalities, consulting firms...)

2

- Preparation of land use master plan projects and their publication online.

3

- **Online publication of governorates ATLAS including economic, environmental and social data.**
- Implementation of a database that includes natural, environmental, demographic, economic, social and urban specific data of each governorate in Tunisia in order to make a current diagnosis of the governorate and to establish specific and appropriate development programs.

Commitment n°20: Devoting transparency in the area of environment protection

Creation of an environment and sustainable development observatory

Creation of an environment and sustainable development observatory that will be responsible for collecting, analyzing, publishing data and statistics and indicators about the environment and about sustainable development and responsible for regular publication to ensure follow up of the situation of the environment (diseases, quality of water, pollution).

The adhesion of Tunisia to the Aarhus Convention

The adhesion of Tunisia to the Aarhus Convention related to access to information and public participation in decision-making and possibility of access to Justice in case of environmental matters.

International estimate allocated to the efforts made by Tunisia to open government

Presentation of the National Action Plan Open Government Partnership by Mr. Angel Gurria General Secretary of the Organization for Economic Cooperation and Development in Paris during international forum on 30 September 2014.
